

The DryerGenie System

Set It, Forget It, Perfectly Dried Resin Every Time

- The drying process has always been a guessing game, all because we never knew the resin's starting moisture point...until now.
- Introducing a completely new way to dry resin that guarantees the highest quality, the least drying time, & the least energy use, every single time.
- The guessing game is finally over! DryerGenie dries your resin perfectly in the shortest amount of time possible...so you can make more parts each day!

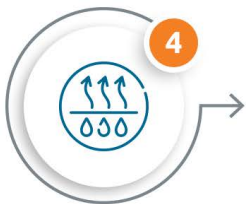

You Define Your Target Resin Moisture

Genie Measures Your Input Resin Moisture

Genie Determines Perfect Residence Time

Genie Monitors The Drying Process

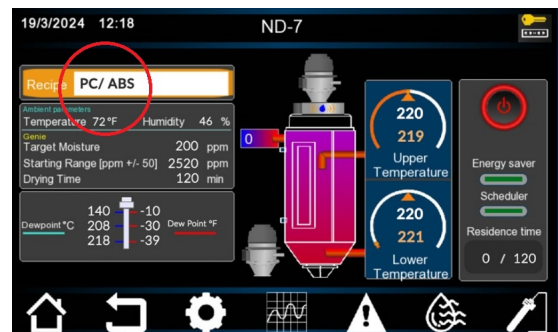

Genie Adjusts The Drying Process As Necessary

Genie Delivers Perfectly Dried Resin Every Time

› So Easy to Use : Effortless Automation

Simply select your material recipe and let DryerGenie take the helm – delivering impeccably dried resin in the shortest time.

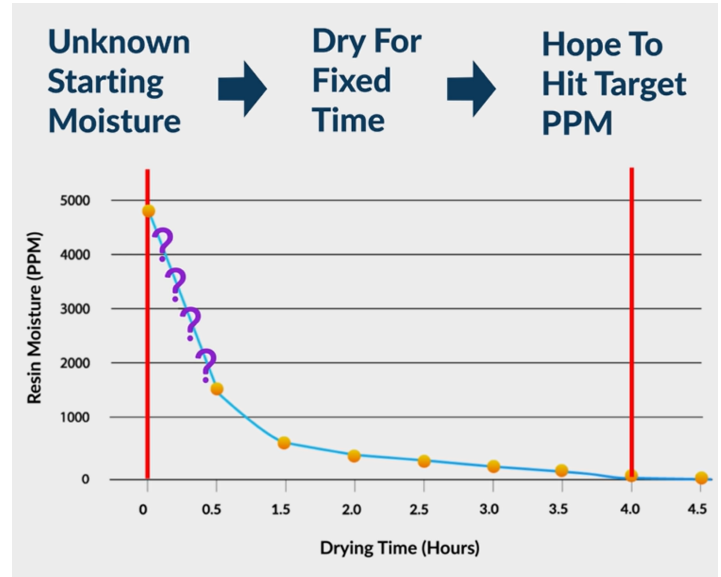

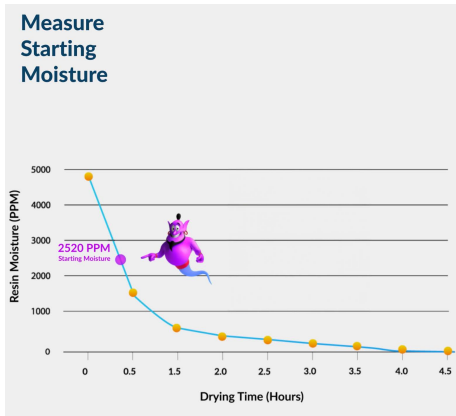

The DryerGenie System

Yesterday's Way of Drying

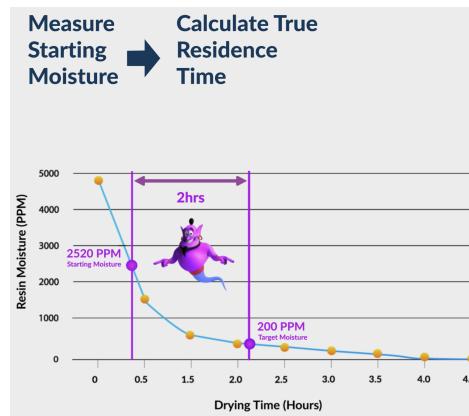

- Resin supplier spec sheets are based on unknown moisture content.
- The result? Too much drying or too little drying, fails to guarantee optimal results.
- Resin supplier provides process guidance that "hopefully" gives an acceptable outcome...
- ... but they don't know the starting moisture content in your plant.

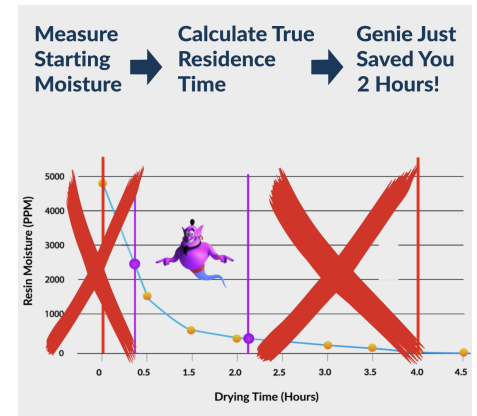

Drying Redefined with DryerGenie

Precisely pinpoints your resin's exact moisture content in real-time.

Eliminates the guesswork and determines true residence time.

Reduces drying times & increases machine uptime.
